

How to charge

Fully charge the device before first use. Insert the plug into the socket on the back of the toy. During charging, the backlight indicator will flash. After charging is complete, the backlight indicator will remain on until completely disconnected from the power supply. The device is fully charged within 60 minutes. The device's operating time is 60 minutes. Please use chargers with a voltage of 5V and charge the device exclusively with the provided charging cable.

How to use

Turn on/off by long pressing the button on the device. Switch modes by short pressing the button. To use all the features of the device, download the application and follow the step-by-step instructions on the back of the manual.

How to care of

Clean the device using warm water and shower gel. Dry it with paper towels. Use special disinfectant for toys. Don't use disinfectant that contains alcohol! Avoid getting water inside the device circuit to prevent damage. Keep the device in a cool and dry place away from direct sunlight.

How to eco-friendly dispose

1. Remove the Battery: If possible, carefully remove the lithium battery from the device. Be sure to follow safety precautions to avoid puncturing or damaging the battery.
2. Recycle the Battery: Take the lithium battery to a designated recycling center or a collection point that accepts batteries. Many electronics stores and local waste management facilities offer battery recycling programs.
3. Dispose of the Silicone: For the silicone part of the device, check if it can be recycled. Some recycling facilities accept silicone, while others may not. If recycling is not an option, consider reusing or repurposing the silicone material.
4. Check Local Regulations: Always check local regulations regarding electronic waste disposal to ensure compliance with environmental laws.

By following these steps, you can help minimize environmental impact and promote responsible disposal practices.
