

INSTRUCTIONS FOR USE: ANAL STRAPLESS STRAP-ON

NATURAL

CARE

Wash the toy under warm water and treat it with a special Love Protection toy cleaner before and after each application. Apply a special powder for sex toys after drying. The toy can be boiled for additional disinfection.

STORAGE

Keep Natural Seduction strap-ons in a special satin bag out of the reach of children. The bag will protect the toy from direct sunlight, dust, as well as minor damage, such as scratches or rubbing of the material.

USAGE

Thanks to the lubricant, the use of the strap-on will become as comfortable and pleasant as possible. The Natural collection is compatible with silicone, water, and glycerin-based lubricants.

Natural Seduction strap-ons are held by the muscles of the vagina and are suitable for clitoral and both anal or vaginal stimulation of partners at the same time.

Pay attention! Do not use the same toy for anal and vaginal stimulation. This can lead to a change in the microflora of the mucous membrane. Use a strap-on with only one partner.
